

SUSTAINABILITY STATEMENT

1. INTRODUCTION

Greenlite Lighting Solutions Limited recognises that in pursuing its business objectives it has a responsibility to, and should take the opportunity to, protect and nurture the environment.

By exercising proper control over its activities, Greenlite Lighting Solutions Limited will promote the use of sustainable resources and discourage wasteful or damaging practices.

The Company will commit adequate resource to its environmental responsibility.

This Policy Statement sets out the Company's aims and objectives for safeguarding the environment.

This statement and policy will be supplied / made available to employees and subcontractors, to ensure they comply with our policies.

Upon request, this statement & policy will be supplied to other members of the public.

2. AIMS & OBJECTIVES

Greenlite Lighting Solutions Limited is committed to the conservation and improvement of the environment and to minimising the risks of adverse environmental impact arising from its activities.

The Company is also committed to compliance with environmental legislation and applicable regulations.

Greenlite Lighting Solutions Limited will manage its operations in ways which are environmentally sustainable and economically feasible and will provide appropriate environmental education programmes for its staff.

In order to achieve these aims Greenlite Lighting Solutions Limited has the following key objectives:

- To promote sound environmental management policies and practices throughout the Company
- As a minimum, to comply with the requirements of relevant legislation
- To work with clients to achieve the highest degree of sustainability within the requirements of a project
- Sustainably sourced materials will be used where possible, for example FSC wood will be used in construction
- Wherever possible materials with low embodied carbon will be used, and construction waste will be prevented from the design stage onwards.
- In design and in order to minimise impact on surface water drainage systems the project will endeavor to include sustainable drainage features within its design.
- To make efficient and environmentally responsible use of energy and water
- Where appropriate to use materials with good thermal properties which will minimize energy loss through a reduction in escaping of heat
- To promote responsible procurement of goods and services
- To minimise waste production as far as practicable and to reuse or recycle waste where appropriate and to regulate the treatment and disposal of residual waste
- To reduce and where practicable prevent pollution
- Efficient use of energy will lead to lower operational carbon output
- To strive for continual improvement in performance

ENVIRONMENTAL POLICY

1. INTRODUCTION

Greenlite Lighting Solutions Limited has commissioned an environmental review which has in turn led to the production of this Environmental Policy document.

The Policy document sets out the Company's procedures to be followed in order to ensure compliance with all relevant statutory legislation regarding protection of the environment.

2. APPLICABLE LEGISLATION

- Environmental Protection Act 1990
- Pollution Prevention and Control Act 1999

3. RELEVANT REGULATIONS

The Regulations to be complied with are:

- Environmental Protection (Prescribed Processes and Substances) Regulations 1991
- Pollution Prevention & Control (PPC) Regulations 2000

Schedule 1 of the latter contains a list of activities which require possession by the operator of a permit before such activities can be carried out. Greenlite Lighting Solutions Limited activities, summarised below, do not fall into this category and therefore no permit is required. Nevertheless, Greenlite Lighting Solutions Limited recognises that these activities can have environmental impact and that any adverse impacts must be minimised.

4. MAIN COMPANY ACTIVITIES

The main activities carried out by Greenlite Lighting Solutions Limited which are deemed to have the potential to affect the environment are as follows:

- Travel to and from sites where Company services are required
- The setting up of site compounds for long term contracts
- Preparation of areas for landscaping including spoil removal
- Dismantling of site on completion of work
- Emissions to air from engines (vehicles and equipment) and paint (HAP)

The Policy addresses each of these activities and details the measures to be adopted to minimise their adverse environmental impacts.

5. IMPACTS AND ASSOCIATED POLICIES

5.1 Travel

- Greenlite Lighting Solutions Limited will seek to minimise the amount of travel that is associated with each contract. To this end, the environmental incentive is inherently assisted by the financial incentive to reduce vehicle running costs.
- Greenlite Lighting Solutions Limited will ensure that vehicle engines, and any other equipment fitted with devices to reduce emissions, is maintained in accordance with manufacturer's instructions / government regulations in force.
- Greenlite Lighting Solutions Limited will ensure that multiple (if not maximum) occupancy will be achieved wherever possible

5.2 Site Setup

Where applicable, site setup will normally be implemented in an area designated and provided by the Client. The Client will also specify the services that are available – water, electricity, drainage etc.

- Greenlite Lighting Solutions Limited will set up each site in accordance with Client instructions.
- For welfare reasons, as well as on environmental grounds, these facilities will be kept clean and serviced by the Company
- As appropriate, Greenlite Lighting Solutions Limited will provide protective fencing to define the perimeter and to minimise any environmental impact on surrounding areas
- Suitable receptacles will be provided for the safe storage of normal domestic waste within the compound as per normal procedures in that area
- Greenlite Lighting Solutions Limited will continue to ensure that utilities are not wasted by a 'Turn Off if not Required' policy

5.3 Preparation

All surfaces will be prepared using only the specified permitted substances and in accordance with COSHH Regulations.

5.3.1 Materials Removed

Asbestos:

If the presence of asbestos is discovered, all such material will be either made safe or removed only by licensed operators acting in accordance with the relevant Regulations.

Hazardous Waste

Any other hazardous waste shall be stored separately from non-hazardous waste and disposed of using the services of a licensed waste contractor. (See also 5.4.2)

General Waste

This will be removed from the site and disposed of in accordance with Local Authority bye laws.

5.3.2 Materials Used

Tools

Most of the basic preparation is carried out using hand tools or portable power tools. No environmental impact is associated with the use of these items. At the end of their lives the tools will be disposed of taking into account of their metallic content.

Where required, appropriate and up to date equipment will be used. The major components which can have an effect on the environment are:

Fuel for portable generators

- The usage will be minimised and the engine will be stopped when the machine is not required
- Drip-trays will be placed to collect drips and spills
- Re-filling of fuel tanks will carried out using the correct equipment and any spillage dealt with promptly and efficiently

5.4 Chemicals.

The chemicals will be applied in accordance with the manufacturer's guidelines. The potential impact on the environment falls into two classes:

5.4.1 Materials Used

- Spillage, drips and overspray will be minimised by the use of the appropriate application method
- Any spillage which does occur will be cleaned up in accordance with the manufacturer's guidance
- Where possible and where permitted by the Client, non-hazardous materials will be used to reduce the presence of pollutants

5.4.2 Application Tools & Materials

- Brushes and other tools and cloths will be disposed of in specially provided containers (i.e. separate from those provided for domestic waste)
- Empty cans and other such containers will be placed in a secure enclosure provided specifically for this purpose
- These items will be removed from the site by a registered waste contractor

6. Compliance

No non-compliances have been recorded in the past five years and this policy is intended to ensure that this level of achievement is maintained.

Whilst Greenlite Lighting Solutions Limited accepts the main responsibility for implementation of this Policy, individuals have a very important role in co-operating with others to safeguard the environment. Individuals therefore must recognise that they are obliged to abide by any rules and regulations made under authority of this Policy.

7. Continuous Improvement

Within the limited and specific services provided by the Company, where Greenlite Lighting Solutions Limited is not involved in manufacture, and have to use products produced by others, there is only limited scope for improvement. This scope will embrace the following:

- Greenlite Lighting Solutions Limited will continue to pursue its policy of seeking to use products which cause the least amount of damage to the environment
- Greenlite Lighting Solutions Limited will continue to recommend only the use of these products to Clients where appropriate
